

Hapa Preventive Maintenance Services

Regular maintenance ensures a long life cycle, minimizes downtimes and preserves the value of your Hapa system.

Hapa offers **preventive maintenance** at an **all-inclusive flat rate** and a **3-year plan**. This allows you to anticipate when your system requires which maintenance measures or spare parts. And you already know which annual costs you will need to budget for the next 3 years. It couldn't be easier.

YOUR BENEFITS

- Reduce overall operating costs by up to 15%
- Minimize production downtime and improve OEE
- Controlled and planned maintenance stops
- Reduce spare parts inventory
- Achieve best possible print quality
- Preserve system performance and value

Hapa Preventive Maintenance Services

SCOPE OF PREVENTIVE MAINTENANCE

- Overall system checkup and cleaning by a Hapa expert
- Exchange of wear and tear components
- Software adjustments and updates
- Recommissioning of machine including print test
- Knowledge exchange with your production team and training recommendation
- Professional machine assessment
- Recommendations on machine-specific modernizations and upgrades
- Overview of critical parts
- Detailed report of the state of the machine and preventive work done

The all-inclusive flat rate includes:

- Spare and wear parts replaced with standard maintenance
- Technician visit (on average once a year, depending on machine operating hours)
- Travel costs (only flat rate Europe*)

CONDITIONS

Maintenance contracts are ideally set up before the start of operation of a Hapa system in order to achieve the greatest possible effect. The start of a maintenance contract after the commissioning of a Hapa system might require a checkup or revision prior to start of a maintenance contract. Regular maintenance work according to the operator's service manual is excluded from the scope of delivery.

The basis for a maintenance agreement are the operating hours of the machine per year, e.g. maintenance performed at 2'000, 4'000 and 6'000 hours (the average annual industry standard operating time is between 1'800- 2'200 hours in the pharmaceutical industry).

GET A QUOTE NOW

Benefit from preventive maintenance services and ensure the long-term return on investment of your system. We are glad to send you a non-binding quote. Simply send an e-mail mentioning your Hapa system model and number to service-sales@hapa.ch.

*for the costs and available flat rates for all regions please contact service-sales@hapa.ch.
